

HD Satellite TV Solutions for Recreational Vehicles

Note: You can change satellite providers by changing just the LNB Arm assembly (four (4) screws to make the change)). Then change the configuration of your controller. No need to replace your whole system because you want to change program providers.

RF Mogul is a manufacture of mobile satellite television reception solutions for the following satellite television program providers....

United States

DirecTV
Dish Network

Canada

SHAW Direct
Bell TV

The **EAQLE** is the most advanced HD satellite Television System available. This model is manufactured in Salt Lake City. The Eagle provides a robust platform and many features. It is designed for many years of performance and reliability.

- SWM Technology for DirecTV (SWM-3)
- Triple satellite , quad output , xKu LNB for SHAW (formerly the Star Choice Company)
- All systems are High Definition
- Uses built in GPS for location and Search
- Stowed height is 8.5 inches
- 12 VDC operation
- Still the lightest system in the industry (a mere 44lbs. soaking wet)
- Advanced single case AZ-EL Gearbox design with Commercial Grade motors and Gears.
- Can be changed from one programming service to another by simply replacing the LNB Arm Assembly and changing the programming code. No need to purchase a new system. ** Shaw exceptions.
- Upgradeable Controller with USB Port that programs in 15 seconds to give you all the latest features.

MODEL LINE UP

- EAQLE** 1 SHAW (Canada xKu Triple Sat)
- EAQLE** 2 DirecTV SWM-3
- EAQLE** 3 Dish Network (3 Sat LNBF)
- EAQLE** 4 Bell TV (Canada, 3 Sat LNBF)

- DVB and NID technology for true satellite identification
- Simple to use. POWER, SEARCH and STOW buttons
- Roof protection LNB arm Landing Plate
- Adjustable Mounting Feet for ease of installation
- Receivers and Program packages sold separately

OPERATION

The RF Mogul TV systems are fully auto-acquire satellite TV products that are designed to work anywhere the program providers signals are accessible. With a simple push of the "SEARCH" button, the RF Mogul system will automatically locate, identify and lock onto the programmers satellites using the latest in innovative technology. The mount will return to its stowed or travel position by pressing the "STOW" button. The POWER will shut off automatically after acquisition or when the mount has returned to its proper stowed position.

DirecTV

Features HD

- 70cm High signal gain antenna
- DirecTV Satellites
SWM-3 99Ka, 101Ku and 103Ka

Using SWM technology

USA

Operational Specifications

Operational Voltage: 12VDC

Amperage Draw During Acquisition: Less than 3 amps (Powers off after acquisition and stow.)

Stowed Height: 8 1/2"

Weight: 39lbs.

Mount Drive: Elevation Azimuth and Skew are screw gear driven

Rotation Azimuth: 375°

Rotation Elevation: 0 to 120°

Typical Acquisition Time: Less than 5 minutes from stow typical

Dish Network / BELL TV
