

# Iridium Certus<sup>SM</sup>

The advanced new multi-service platform powered by the Iridium network

# Improve operations with greater value and better coverage than any other mobile wireless network.

Iridium Certus<sup>SM</sup> is the new multi-service platform powered by the Iridium network. With uncompromising coverage and a range of speeds debuting at 352 kbps, upgradable to 704 kbps, the system will deliver global, reliable, enterprise-grade services while redefining the capabilities of mobile satellite communications. Through Iridium Certus, we're making broadband truly mobile and truly global.

## Everything Within Reach.<sup>SM</sup>

Iridium Certus offers more than just connectivity – it is an expanding portfolio of high-value service offerings that will scale to meet the demands of your business and allow it to operate more efficiently.

### Versatile

Iridium Certus will accommodate a full range of services – high quality voice and IP data, push-to-talk, streaming, cockpit safety services and GMDS on a single platform. Whether your application is large or small, high-speed or low-speed, Iridium Certus will deliver the right service to meet your business needs.

### Reliable

The unique overlapping architecture of the Iridium network provides availability, redundancy and reach no others can match. Iridium is depended upon for essential communications across the globe, meeting the rigorous security requirements of governments, safety standards of the aviation industry, and coverage of far-reaching maritime operations.

### Mobile

Innovative, lightweight solutions for Iridium Certus, leveraging the added speed and power of the Iridium network, make it easy to connect on the move. Iridium's Low-Earth Orbit constellation allows for low-power, smaller form-factor devices with unprecedented levels of mobility and capability – anywhere you operate.

### Enterprise-grade

Iridium Certus provides peace of mind that your operational needs will always be met. With exceptional availability and fully scalable high-performance solutions, Iridium's reliable global network ensures mission- and business-critical capabilities are supported.

## A full range of speeds

**Iridium Certus<sup>SM</sup> 100**  
88 kbps ↓↑

**Iridium Certus<sup>SM</sup> 200**  
176 kbps ↑

## Your World. Our Network.<sup>SM</sup>

Iridium Certus is designed to support a full range of versatile applications for any market, and any need on the ground, in the air and at sea – all built on a single platform.

### Maritime

With highly robust equipment, extreme reliability, and the highest L-Band throughput to all seas, Iridium Certus is ideal for maritime operational and safety services. It delivers the satellite communications technology that the industry demands, combining all of the benefits of L-Band with VSAT and truly global coverage – including the poles.

### Aviation

From cabin to cockpit and runway to flight ceiling, Iridium Certus will deliver operational efficiencies, critical safety services, in-flight communications and an undeniable business advantage – enabling the safe, timely and efficient passage of aircraft to their destination. With highly reliable coverage and low total solution costs, it will be perfectly suited to meet the needs of the global aviation community.

### Land Mobile

Iridium Certus sets the new standard for remote connectivity for enterprises, governments, and individuals that want to extend their use of mobile networks into remote areas, without having to deploy ground-based infrastructure or expensive terminals. Iridium Certus is also an ideal backup for terrestrial services in case of disaster.

It also integrates with Internet, cellular, Land Mobile Radio, and location-based applications to keep you connected anywhere on the planet.

### IoT

Iridium Certus will provide a new platform for innovative and powerful Iridium IoT solutions. Higher speeds, small form-factor transceivers and increased bandwidth – along with continued support for existing data services – will unlock new possibilities in asset tracking, fleet management, remote monitoring, command and control and other intelligent data applications around the globe.

### Government

Iridium Certus will deliver secure, reliable and mobile global expeditionary communications supporting all aspects of air, land and sea operations. It is the ideal solution for Enroute Mission Command and Control (EMC2) and other broadband applications where beyond-line-of-site communications are critical to mission success. Military users rely on Iridium's network to keep assets in the field connected every day on the move.

**Only one communications company connects the entire globe**

Iridium commands the world's furthest-reaching network, making it the only truly global communications company with solutions that span from pole-to-pole. Iridium® voice and data products provide superior communications solutions that allow global companies, government agencies and individuals to stay connected everywhere. With a unique global ecosystem of partners, Iridium continues to create new, high-value capabilities that are leading the world into a new era of communication. And through Iridium Certus<sup>SM</sup>, Iridium now delivers essential, enterprise-grade broadband connectivity while redefining the capabilities of mobile satellite communications.
